

AWS GenAI Demo-Case by copebit

Together into the future: Cloud technologies — GenAI Demo Case

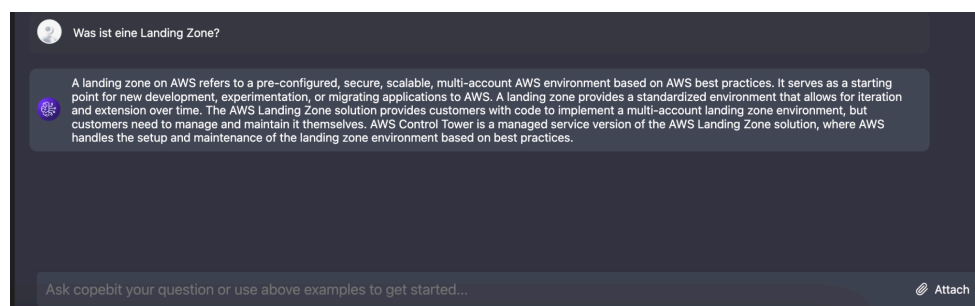

Overview / Problem definition

Generative AI, chatbots, and models such as ChatGPT are currently in the spotlight, and many companies want to exploit the potential of these technologies. But what exactly is generative AI and how does it work? How can companies use this technology intelligently and productively? Is there a straightforward way to try out these innovations without having to commit to an on-premise integration or a specific solution?

The answer is yes. copebit offers companies the opportunity to test generative AI in a demo case — without the need for their own installation or cloud environment. The aim of this offer is to familiarize companies not only with the technology itself, but also with its many possible applications and potential risks. On this basis, sensible next steps can be developed and planned.

Our copebit demo case is already equipped with special copebit data that has been specifically prepared for this use case. **On request, we can also integrate customer-specific data or carry out an ad-hoc analysis of the data provided by the customer.** We would be happy to present the structure and security solutions of our demo case to you and are available for a personal meeting to discuss further requirements and innovative ideas.

Offer

Our **generative AI** services focus on the following areas:

	GenAI Demo Case Basic	GenAI Demo Case Advanced	GenAI Demo Case Premium
GenAI basic demo, information exchange, getting to know each other / clarifying needs	free	4h workshop GenAI, fundamentals, customer data import	2x 4h workshop GenAI, landing zone and other services, base services, customer data import
Cloud training	n/a	optional	X
1x GenAI standard use case / PoC (duration max. 1 month)	n/a	optional	X
further PoCs	n/a	optional	optional
Development support for PoCs / MVPs together with the faculties	n/a	n/a	X

- **Basic:** Ideal for beginners in the fields of generative AI and cloud technologies — perfect for initial insights, targeted knowledge transfer and a clear demo of the copebit GenAI use case.
- **Advanced:** Includes all the services of the Basic package and is aimed at customers who already have their own use cases and would like to carry out proof of concepts (PoCs), but still have limited knowledge of cloud and GenAI technologies. This package includes extended consulting on the optimal implementation and use of the technologies.
- **Premium:** Includes all services of the Basic and Advanced packages and is aimed at customers with high requirements in the areas of GenAI and cloud technology who are already actively working on business use cases. Ideal for in-depth discussions and comprehensive design and architecture considerations in order to develop customized solutions.

Costs

The standard services are available at a fixed price. Not included are the recurring costs for the AWS services, which are charged separately. However, many functions and products can be tested as part of the AWS Free Tier (i.e. without additional AWS costs). As an AWS Advanced Consulting Partner, copebit offers its customers attractive funding opportunities as part of the AWS Funding Program. Prices for individual services are available on request.

Contact/ copebit AG

At copebit, we have extensive experience and the necessary expertise in all areas to support your business transformation. Our focus is on AWS cloud technologies, which form our core competence as an AWS Advanced Consulting Partner.

copebit AG is a leading Swiss IT company specialising in cloud consulting, development, engineering, and operation. We are experts in the latest cloud technologies and project management, from HERMES 5 to agile frameworks such as SCRUM and SAFe. Our goal is to deliver exceptional results and build successful partnerships with our clients.
